Orders for delivery of the Daily Press to either residence or place of business may be made by postal card or telephone.

### MAIL SUBSCRIPTIONS.

(Payable Invariably in Advance.)  
One Month ..... \$ .50  
Three Months ..... 1.25  
Six Months ..... 2.50  
One Year ..... 5.00

### TELEPHONE NUMBERS.

Editorial Rooms...Bell 'Phone No. 14  
Business Office...Bell 'Phone No. 181

No employee of the Daily Press Company is authorized to contract any obligation in the name of the company, or to make purchases in the name of the same except upon orders signed by the PUBLISHER OF THE DAILY PRESS.

Entered at the Newport News, Va.,  
Postoffice as second-class matter.

THURSDAY, APRIL 26, 1906.

### INSURANCE GRAFTERS.

In referring to an effort to strike from an insurance bill before the New York legislature a clause giving the policyholders the power to exercise control over their own interests in the selection of trustees, the New York Journal of Commerce says:

"The attempt to strike out this vital provision proceeded from the companies which made it so necessary, was directed by the lobbying that has been so discredited, and was made effective, at least momentarily, by a class of political tools who have been the chief instruments of corporate power in time past, for betraying the interests of the people. If the bill has been saved from this deadly blow by the sudden shock to public opinion and its prompt assertion of its power, by the intervention of the governor and the shrinking back of some of the conspirators before the menace of popular wrath, it is no less plain that some of those who are still intrusted with the direction of great life insurance companies were engaged in the attempt at assassination. The lobby was not working for nothing and there was nobody else to hire it. These men have not yet fully learned their lesson, and in this instance they demonstrated the need of a further purgation of life insurance management."

The men who are interested in maintaining the old conditions which prevailed in New York insurance companies, probably banked upon the forgetfulness of the public. Revelations as startling as those which were made before the Hughes committee have been forgotten less time and the grafters perhaps thought matters would take the usual course and that they could with perfect safety change the current of the entire business and direct it back into the old channels, which they found so profitable and pleasant.

There is not only need for further purgation of life insurance management, but a crying necessity for more than a passing memory of the erstwhile extravagances and excesses.

### EARTHQUAKES AND THE CANAL.

The destructive earthquake at San Francisco has caused some persons to question the desirability of a lock canal across the Isthmus of Panama, the contention being that while a sea level waterway might not be injured by seismic disturbances, it is more than probable that a lock canal would seriously suffer and might, in fact, be absolutely destroyed.

Chairman Shonts, of the canal commission, however, seems to think that there is little or no reason to fear seismic disturbances on the route of the canal. He declares that Panama has felt the force of seismic tremors less for hundreds of years than any place in the earthquake zone. He calls attention to the fact that there is a flat arch of cobblestones and cement in Colon with a six-foot span, the only arch of the kind in the world which has stood for a hundred years. It is the door of a church. It is pointed out that it

never could have survived a serious earth tremor.

Now that is all very well so far as it goes and is more or less encouraging, but earthquakes, like lightning, seldom give extended notice of their approach and, as was illustrated in the case of Charleston, sometimes seem to strike places not in the earthquake zone. If the Isthmus is subject to seismic disturbances there is no telling when a serious earthquake will go that way, and it may be that Uncle Sam will in the end be forced to build a sea-level canal, even after expending \$150,000,000 on one built on the lock plan.

Twenty-five Russian authors have got together and passed resolutions condemning Mark Twain and the rest of us for our treatment of Maxim Gorky. If the twenty-five will come over under similar conditions we would be delighted to give them the same sort of treatment. Americans are yet barbarians enough to believe that a man's family life is a true index to his character.

When every Senator has said all he can think of, something will be done with the railroad rate bill.—Florida Times-Union.

If they would only confine themselves to the things they can think of themselves!

The Chicago News says: "The same scientist would arise and blame the earthquake on the sun was a foregone conclusion." Why worry over it, then. The sun doesn't seem to be alarmed over the accusation.

The Czar has succeeded in borrowing \$400,000,000. This will hardly go half way in paying the cost of the war with Japan.

Senator LaFollette in his maiden effort showed that he had a proper appreciation of senatorial courtesy.

General Funston didn't have to swim into the press dispatches this time.

### THE ELYSEE PALACE.

Checked Career of the White House of France.

The Elysee palace, situated in the rue Faubourg Saint-Honore, is a cross between a country house and a hotel. It has had a checked career since its erection in 1718 and has harbored some queer characters. Louis V. presented it to Mme. de Pompadour. Who knows how many lettres de cachet went out of the gates to imprison those who lampooned her? Under Louis XVI, it was called the Elysee Bourbon. During the revolution it became national property, was put up for sale, found no purchaser and was turned into a government printing office. During the directory there were gay doings in the fine old rooms, and the mercurielles and incroyables danced and gambled from sunset to sunrise. The room were let to a syndicate who made a large fortune out of the speculation. Since then the palace has been occupied by Murat, Napoleon I., Louis Bonaparte and Queen Hortense. Alexander I. of Russia and the Duc de Berri. After the revolution of 1830 it remained unoccupied until Louis Napoleon made it his residence while he was president of the republic. Nearly all the subsequent presidents of the present republic have added to it. The large glass awning seen from the Faubourg, called by the scoffers "the monkey palace," was the work of Carnot. His also is the large ballroom. The left wing was built by Louis Napoleon, and Greys added a room overlooking the garden. None of the presidents seem to fancy its state bedroom, nor do they write at the Louis XVI. table, ornamented with brass work chased by Gouthier. They have one and all preferred to furnish small rooms away from the solemn state apartments and use an ordinary desk such as we find in any office.—Boston Transcript.

### Lincoln the Lawyer.

It is conceded by all his contemporaries that Lincoln was the best all around jury lawyer of his day in Illinois. Unquestionably his knowledge of human nature played an important part in his success. He possessed another quality, however, which is almost if not quite as essential in jury work, and that is clearness and simplicity of statement. His logical mind marshaled facts in such orderly sequence and he interpreted them in such simple language that a child could follow him through the most complicated cause, and his mere recital of the issues had the force of argument.—Fredrick Trevor Hill in Century.

### An Explorer's Strategem.

Sir Harry Johnston, the famous explorer, once escaped from a very tight corner in Africa by a queer strategem. A score or two of murderous natives had surrounded his tent, into which, before rushing in, they sent an envoy. The envoy was told the smallest was in the camp, and a wretched Albino was sent out as the awful example. In five minutes the scared tribesmen had vanished. As Sir Harry well knew, they feared the "white disease" more than all the inventions of Maxim.

### His Works.

"A man is known by his works," declared the irrepressible reformer, who was addressing a large and enthusiastic audience. "Yours must be a gas works," shouted a rude, uncultured person who occupied a back seat.

### THROAT EXERCISES.

Evils That Come From Misuse of the Vocal Organs.

The chronic sore throat is not infrequently produced by the misuse of the vocal organs. Very often that unruly little member, the tongue, is accountable for the difficulty, as it is for a great many other troubles in this transitory life. Many people have a habit when talking of pushing the tongue so far back against the delicate membranes that line the throat that irritation more or less painful is caused, and if it continues any length of time ulcers will form, and so will a doctor's bill.

Control of the tongue is excellent in all senses of the word. Physically this organ may be managed by depressing it into a hollow at a point three-quarters of an inch back of where the tip of it comes when in a natural position in the mouth and at the same time singing very light head tones. This exercise requires some patience at first, but the habit of keeping the tongue down is soon acquired. In speaking or singing it should not be allowed to loop up and fill the mouth, thus interfering with the free passage of the tones of the voice from the throat to the front of the mouth, where they should strike and then escape clear as a bell. This looping up of the tongue in the mouth is the cause of much of the indistinct and slovenly utterances to which we are so often obliged to listen.

In many people we notice the line from the point of the chin to the neck is in the form of a right angle. In a supple throat this line forms a curve, just as a canary's does when the small yellow artist is warbling his carols.

To develop the throat and make this angle a curve stand before a mirror so that you may watch the throat swell out. Now thrust your tongue out as far as it will go, then draw it back quickly and forcibly, at the same time bringing it downward in the mouth as far as you can. Place your thumb and forefinger against the larynx (commonly called the Adam's apple), and if you are making the right movement you will feel the larynx pass downward. For a week or two make the movements lightly. After that time put as much force into it as you can. The exercise should be practiced for a few minutes several times a day to insure rapid and good results.

To fill up the hollows of the neck stand correctly and then slowly fill the lungs with air without elevating your shoulders. As the air is forced upward into the throat hold it there a few seconds and then expel slowly. This exercise is best performed soon after rising in the morning and before retiring at night.—New York Post.

### Time and Eternity.

The stream of time never runs dry, and the ocean of eternity will forever send its mighty surges mountain high against the bank of time's little stream, sweeping with each receding billow over its expansive bosom the frail human craft from the shore of time, with earth's happiness, human affection, toil, trials, tears and sin, to the eternal shore of celestial beauty and bliss. Oh, mighty ocean of eternity, your wonderful anthem of life and death brings eternal woe and condemnation to him who is untrue to himself and his divine pilot, but to the trusting, faithful man it sings of endless felicity in the presence of time who has redeemed his people from the bondage of sin and has swept them through the pearly gates.—Ducktown (Tenn.) Gazette.

### The Wonderful Diatom.

One of the most wonderful things in vegetable life is a beautiful and minute class of seaweeds called diatoms. They belong to the seaweed family, yet they may be found by the thousands in any roadside ditch, fresh or salt water lake or even in cisterns, wells, springs, etc. Most species of plants are made up of an infinite number of little cells, but with the diatom it is otherwise. Each representative of this wonderful family of plants is formed of but a single cell and this so minute that it would require 2,500 of the most common form, laid end to end, to make a string an inch in length. Some species of diatoms have the power of independent motion, and on that account were for some time believed to be animals.

### Candy and the Flag.

The following is accredited to the late Senator Hoar: At a Fourth of July celebration in a Canadian town where both English and American guests were assembled the flags of the two countries were used in decorations. A frivolous young English girl, loyal to the queen, but with no love for the stars and stripes, exclaimed: "Oh, what a silly looking thing the American flag is! It suggests nothing but checkerberry candy." "Yes," replied Senator Hoar, "the kind of candy that has made everybody sick who ever tried to lick it."

### PACIFIC CABLE OPEN.

Roosevelt Sends Message to Dowager Empress of China.

NEW YORK, April 25.—The Shanghai and Manila offices of the Commercial Pacific Cable Company were in communication by the new cable on last Tuesday. Messages between the President of the United States and Empress Dowager of China have been exchanged.

The laying of this cable finishes the work commenced by the laying of the Commercial Pacific Cable from San Francisco to Honolulu and continued by the laying of cables between Manila and Honolulu by

way of Guam and Midway. Nearly 10,000 miles of submarine cable have been made and laid in an average depth of 2640 fathoms the greatest depth found on the line of the cable was 3190 fathoms approximately 4 miles.

The laying of the cable to China was delayed by the political upheaval in China and later by the war between Japan and Russia. After the treaty of Portsmouth the work was taken up again and the United States is now in communication with its Pacific ocean possessions and with China by means of the cable of an American company, operated by American operators and touching only American soil as desired by the government at Washington.

The China end of the cable from Manila is laid far up into the estuary of the Yangtze River. The cable ship which laid the main part of the cable was unable to maneuver in the estuary, therefore for cable already laid was cut and buoyed and the cable ship proceeded to Wosung where an intermediate type of cable designed for shoaling waters was transferred to a similar ship.

Also the heavy shore end was transferred to a lighter. The difficulties encountered in laying the shore end were somewhat unusual owing to the shallowness of the water, the necessity of accurate location and the unfavorable character of the weather which prevailed during the operations. The shore end is led into a hut at Paoshan. From Paoshan the line is continued by underground wires to the Commercial Pacific Cable Company's office in the city of Shanghai, the principal port of central China, in the immediate neighborhood of the richest silk and tea districts and the distributing point for the whole of the Yangtze valley with its one hundred and fifty millions of population.

About a million tons of American shipping enters and clears there annually. The same organizations and the methods that have not only met but have anticipated the requirements of the public for cabling facilities between Europe and America is applied to these Pacific cables.

Mr. Geo. G. Ward, vice-president and General Manager of all the Commercial Cables is now in the Far East to confer with the government officials of China and to inspect the new cable stations.

1 CENT IS ALL IT WILL COST YOU to write for our big FREE BICYCLE catalogue showing the most complete line of high-grade BICYCLES, TRIPS and SUNDRIES at PRICES BELOW any other manufacturer or dealer in the world.

DO NOT BUY A BICYCLE from anyone, or on any kind of terms, until you have received our complete Free Catalogue, logues illustrating and describing every kind of high-grade and low-grade BICYCLES, TRIPS and SUNDRIES at PRICES below any other manufacturer or dealer in the world. We need a Rider Agent in every town and can offer an opportunity to make money to suitable young men who apply at once.

\$8.50 PUNCTURE-PROOF TIRES ONLY \$4.80 PER PAIR

Regular Price \$8.50 per pair. To introduce We Will Sell You a Sample Pair for Only \$4.80 (CASH WITH ORDER \$4.50) NO MORE TROUBLE FROM PUNCTURES.

Result of 15 years experience in tire making. No danger from THORNS, CACTUS, PINS, NAILS, TACKS OR GLASS. Serious punctures, like intentional knife cuts, can be vulcanized like any other tire.

Two Hundred Thousand pairs now in actual use. Over Seventy-five Thousand pairs sold last year.

DESCRIPTION: Made in all sizes. It is lively and easy riding, very durable and lined inside with a special quality of rubber, which never becomes porous and which closes up small punctures without allowing the air to escape. We have hundreds of letters from satisfied customers stating that their tires have only been pumped up once or twice in a whole season. They weigh no more than an ordinary tire, the puncture resisting qualities being given by several layers of thin, specially prepared fabric on the tread. That "Holding Back" sensation commonly felt when riding on asphalt or soft roads is overcome by the patent "Basket Weave" tread which prevents all air from being squeezed out between the tire and the road thus overcoming all suction. The regular price of these tires is \$8.50 per pair, but for advertising purposes we are making a special factory price to the rider. You do not pay a cent until you have examined and found them strictly as represented.

WE WILL CASH WITH ORDER and enclose this advertisement. We will also send one nickel puncture closer to be used in case of intentional knife cuts or heavy gashes. (These metal nail pullers are for any reason they are not satisfactory on examination.) We are perfectly reliable and money sent to us is as safe as in a bank. Ask your Postmaster, these tires, you will find that they will ride easier, run faster, wear better, last longer and look better than any tire you have ever used or seen at any price. We know that you will be so well pleased with our order at once, hence this remarkable tire offer. We want you to send us a small trial

COASTER-BRAKES, built-up wheels, saddles, pedals, parts and repairs, and prices charged by dealers and repair men. Write for our big SUNDAY catalogue. DO NOT WAIT for a bicycle or a pair of tires from anyone until you know the new and wonderful offers we are making. It only costs a postal to learn everything. Write it NOW.
